

# Coronavirus in Hampshire – *Update*

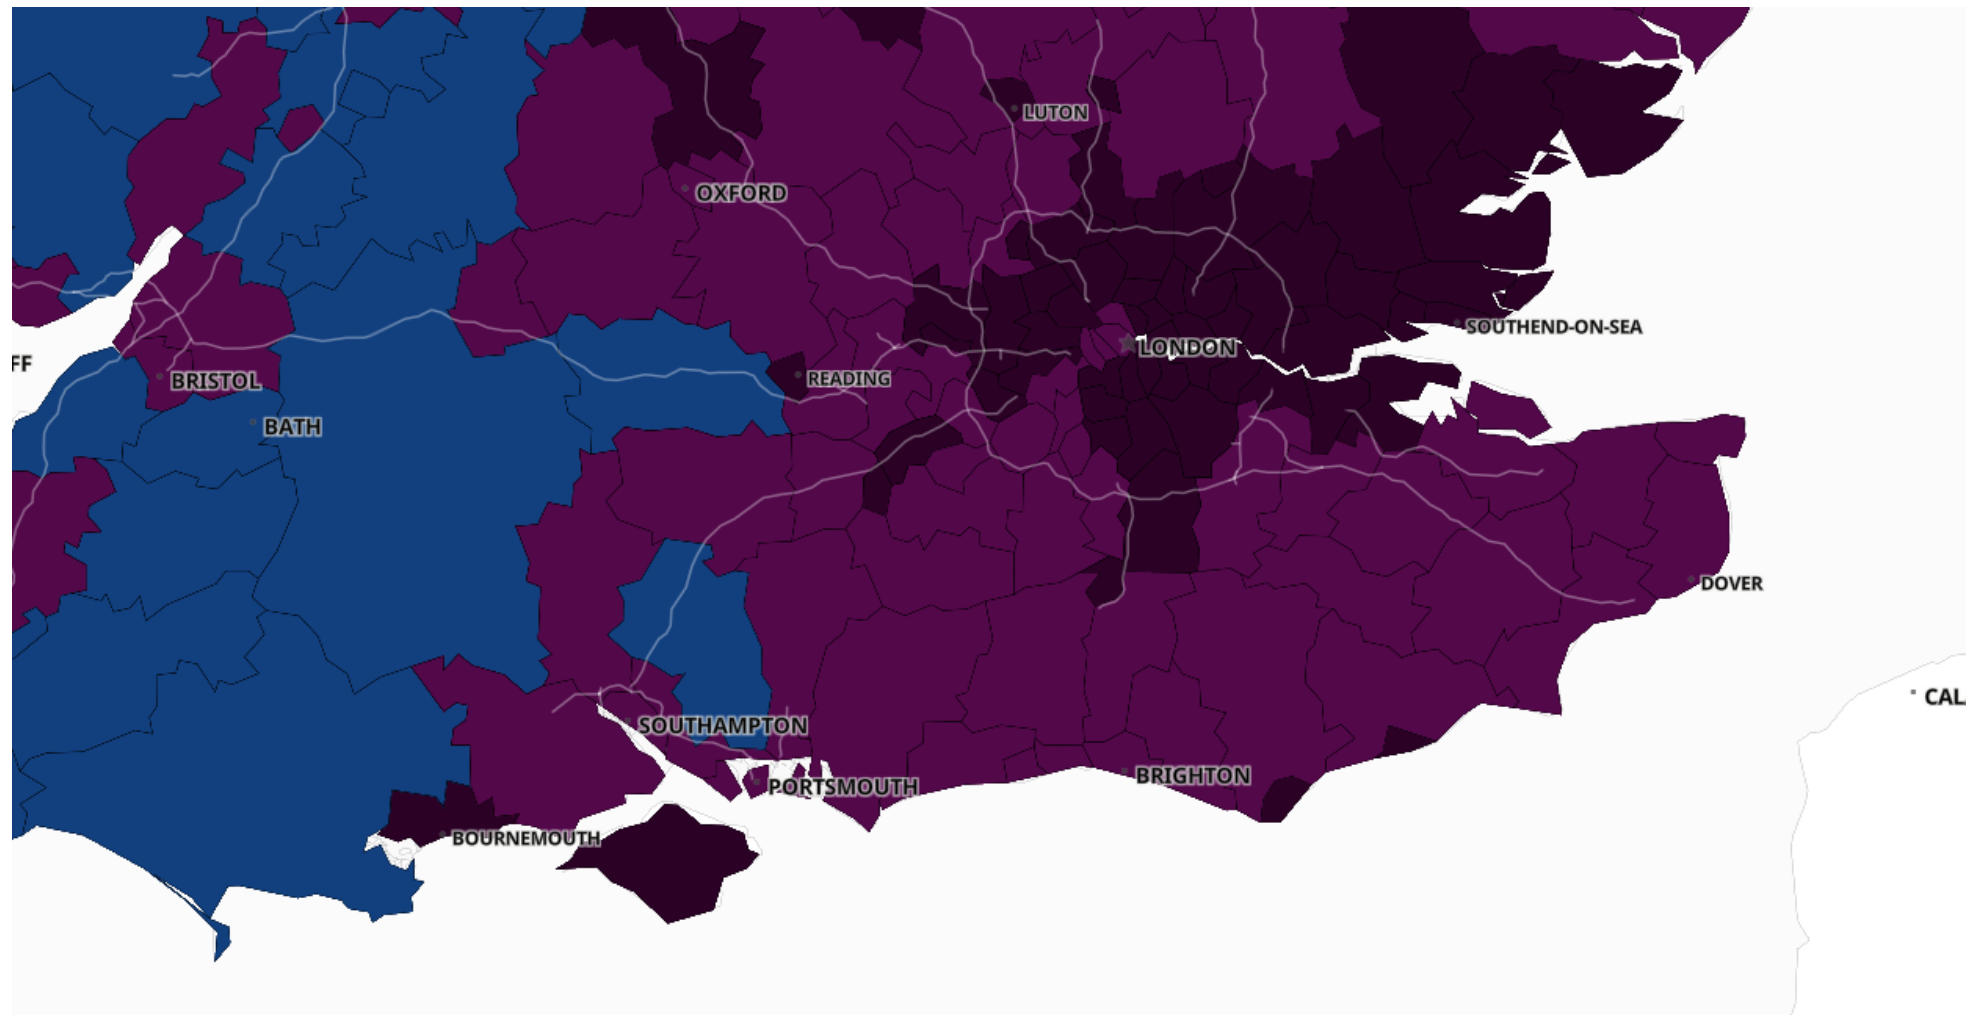

---

February 2021

1 Dec 2020 –20 Feb 2021

Data on district council areas

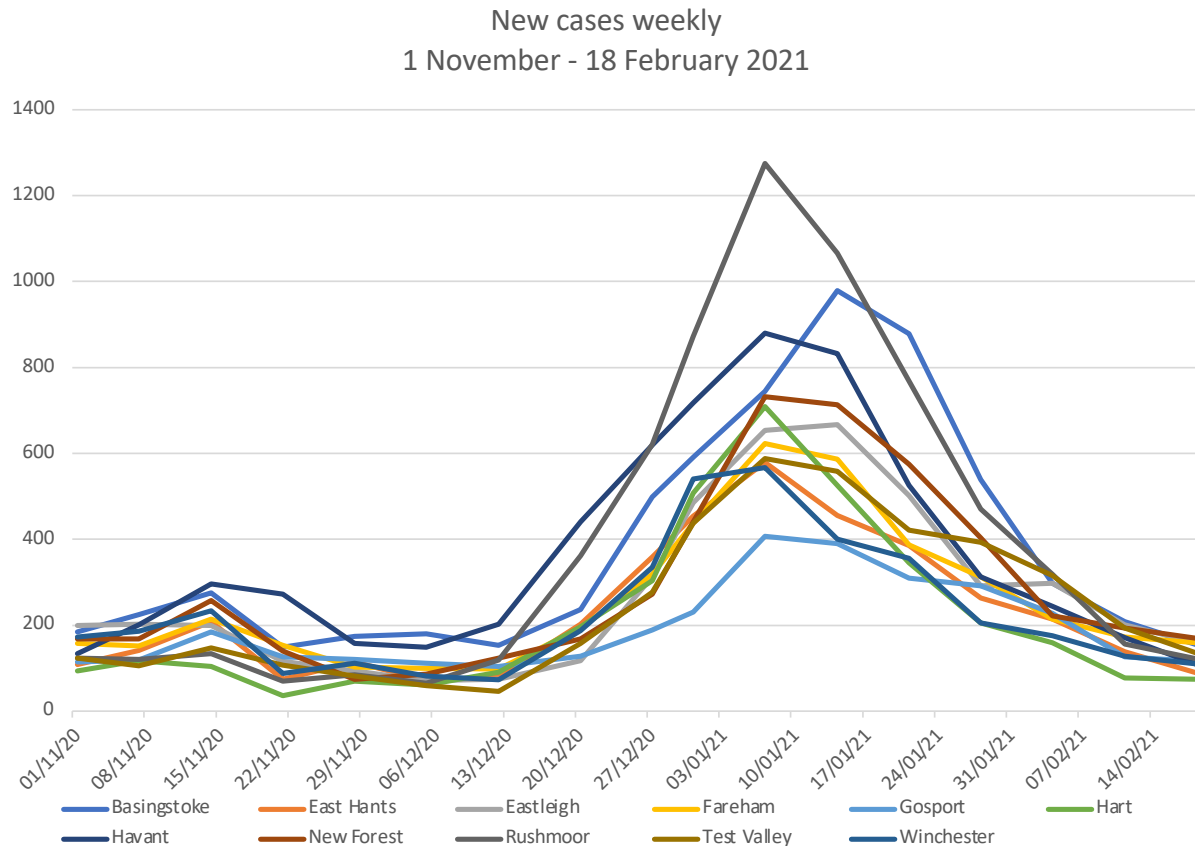

## *Coronavirus across the south- east - 8 January 2021*

## *New cases reported each week since 1 November*

The coronavirus infection rate in Hampshire was on a slowly rising trend through September and October, although there was a blip in mid-November.

The rate of new infections started to rise quickly in mid-December to hit a peak in the first week of January following the lowering of restrictions during the run-up to Christmas and in the holiday period.

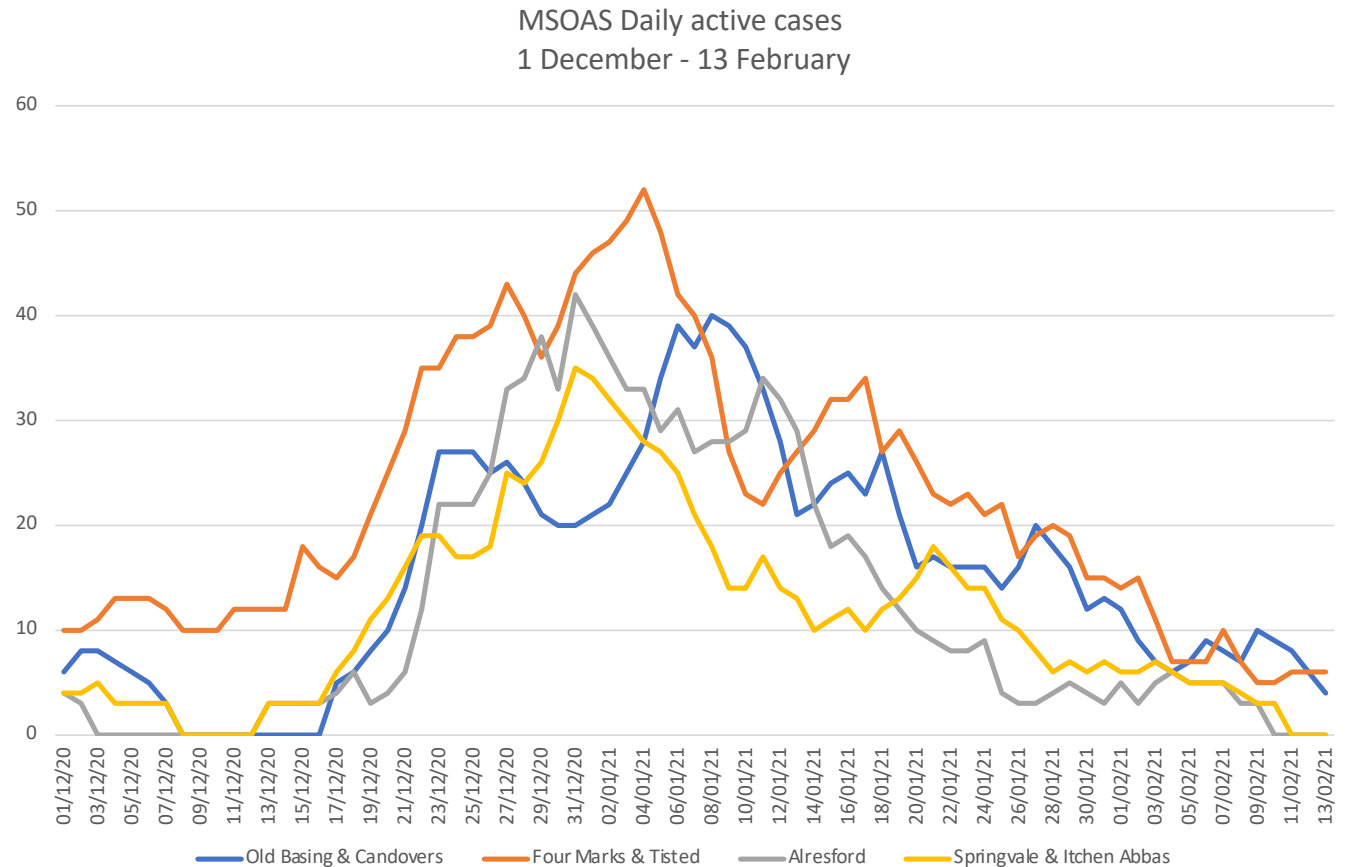

## Peak of second wave of coronavirus

The coronavirus second wave hit its peak in the Candover Valley and neighbouring areas during the first week of the new year, driven by the reduction in restrictions over the Christmas holiday period.

Alresford reached its peak on New Year's Eve with 42 cases on a rolling seven-day basis and a rate of 496.4 per 100,000. Springvale & Itchen Abbas had 35 and a rate of 509.

Four Marks & Tisted (52 and 423 per 100k) and Sutton Scotney & Micheldever (38 and 646.5 per 100k) followed on 4 Jan.

The peak for Old Basing & The Candovers was 8 Jan with 40 cases and a rate of 517.1 per 100k, and Hatch Warren followed on 11 Jan with 60 cases and a rate of 697.

## Month on month increases in new cases

## Percentage increases month on month

Percentage increases  
month on month September to February 18

This chart shows the rate of spread of the virus month on month in Hampshire districts. If the increasing percentage is above 100% it shows it is still spreading, under 100% indicates it may be under control and the rate of infection is reducing. Currently it is now reducing in most districts – at 18 February, all districts showed a very significant fall.

Any district showing a higher percentage than 100% shows the infection rate is increasing; a lower percentage shows it is falling.

*See the following table for details*

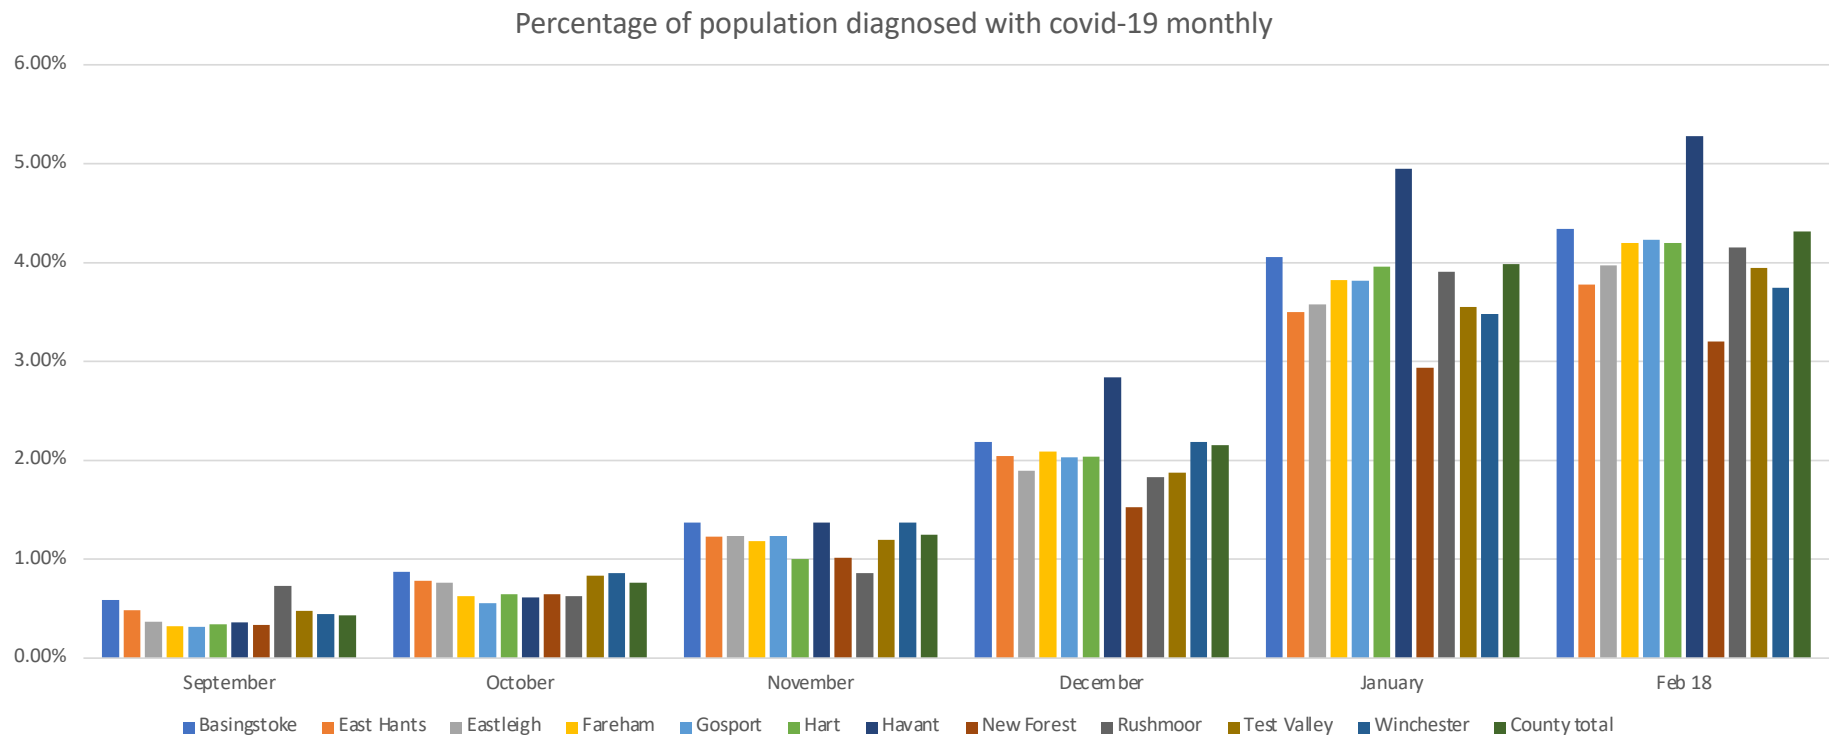

*Percentage increases month on month*

[illegible]

# *Proportion of population in each Hampshire district to have been diagnosed with covid-19*

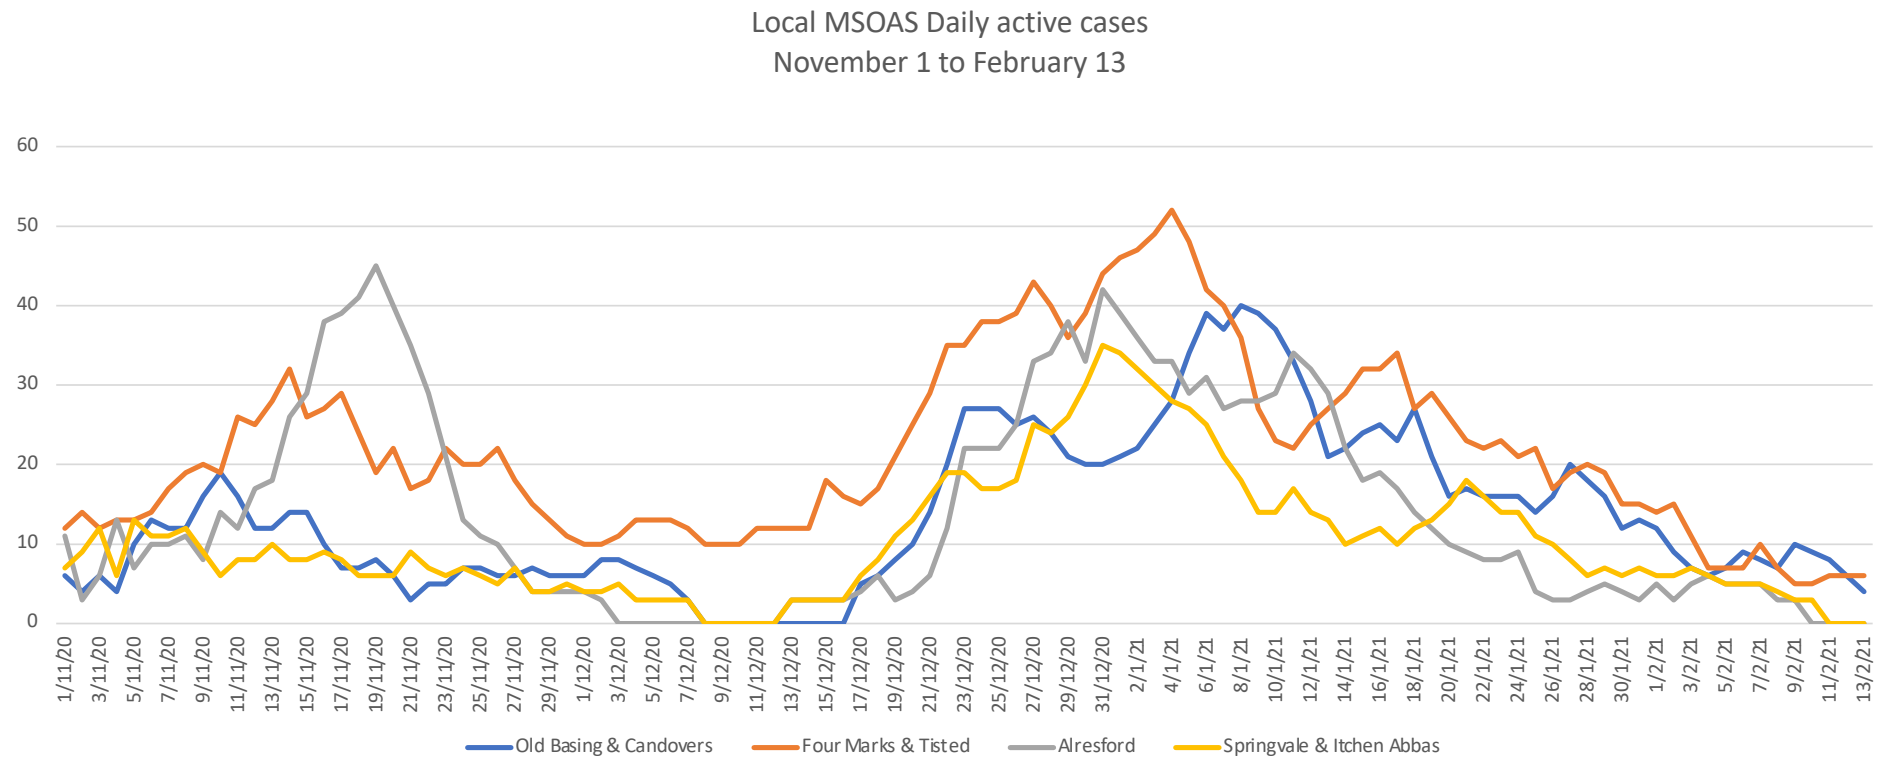

## *Number of new cases monthly and percentage of local population*
