# Percentage increases in new cases, month on month

Percentage increases  
month on month September to January 31

This chart shows the rate of spread of the virus month on month in Hampshire districts. If the increasing percentage is above 100% it shows it is still spreading, under 100% indicates it may be under control and the rate of infection is reducing. Currently it is still spreading in most districts – at 31 January, many districts more than doubled the number of new cases. Any district showing a higher percentage than 100% shows the infection rate is increasing; a lower percentage shows it is falling.

- See the following table for details

## Percentage increases in new cases, month on month

Increases - month on month	Increase				Oct 31	Increase			Nov 30	Increase			Dec 31	Increase			Jan 31	Increase	
	Aug-31	Sep-30	Aug-Sep	Percent	Oct-31	Sep-Oct	Percent	Nov-30	Oct-Nov	Percent	December	Nov - Dec	Percent	January	Dec - Jan	Percent
